Science: This week we will begin our Human Body Systems unit. We will be completing this unit using a PBL class style. Students will be presented with a problem to solve: How would scientists go about redesigning the human creature in order to get the most efficiency out of him? Students will then use the provided unit website to investigate each body system to try and come to a solution. We have created a classroom blog in which students will be blogging about each system. These blogs are teacher monitored and must be reviewed by me before posted on my classroom site. You must have a password to view this site. If you would like to view your students blog, please email me and I will send you the access code. I have created a panel to choose the best design at the end of this unit. If you have any questions or concerns, please contact me.

I DARE YOU

One Class

Pick one class this week and avoid the impulse to leave as soon as the bell rings. Instead, ask your teacher how their day has been.

Practice engaging with your teacher in a meaningful way--follow up with asking how their weekend was or how their family is doing. Perhaps ask them about their favorite type of music, book, or TV show.
